ABSTRACTED-PUB-NO: DE29814503U

BASIC-ABSTRACT: The mobile telephone (A) includes a scanner (E) attached to an outer surface, preferably on a narrow side. The scanner can be activated and deactivated via an on-off switch. The scanner has a protection device or closure lid which protects it.

The scanner is supplied with electrical power by the usual power supply. Data are acquired by the scanner by running it over a bar code label (F). The acquired data are **displayed**, stored and held available for call-up and processing.

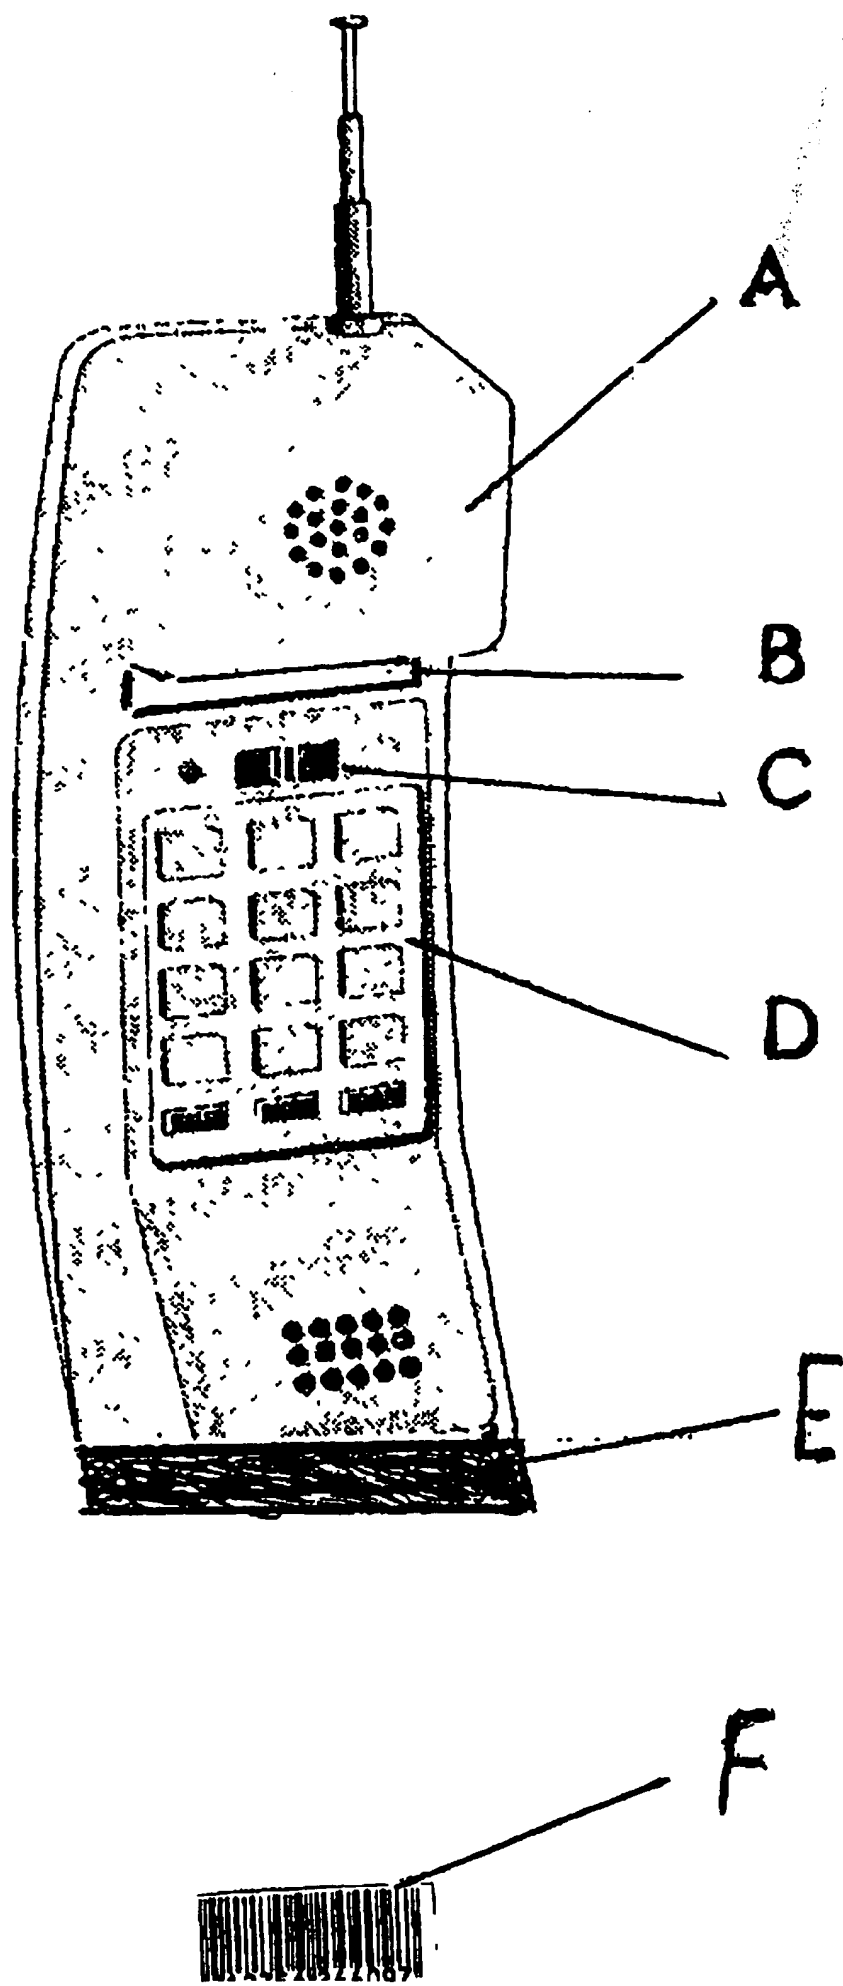

USE - For use in large shops and supermarkets.

ADVANTAGE - Allows storing and converting currencies.

CHOSEN-DRAWING: Dwg.1/1
